## Other Skills

- Knowledge of HTML, CSS, PHP, JAVASCRIPT, MYSQL, MongoDB, NodeJS, WordPress, Wix &
- Knowledge of using GIT and SSH.
- Use of Trello, Slack and work based application for Agile Technologies.
- Highly motivated
- Skilled In Office, Excel, Adobe, Xero, QuickBooks, WaveApps
- Effective use of my own initiative
- Problem solving
- Can work independently or as part of a team

## Work experience

**Web Developer, Universal Web Design** [July 2014 – July 2015] – Working at a website design agency based in Colchester, Essex. Day to day duties were building responsive websites for a range of clients, working on creating database applications for several websites such as; Estate Agencies, Casinos, Modelling Agencies, and Dating Websites. I've worked on projects with Universal Web Design even after I had left the company.

**Freelance Web Developer** [July 2015 - Present] – Freelance website development after my time at Universal Web Design, working with a network of clients that I had built up using websites such as; People Per Hour, Upwork and my own private network created with social networking websites such as; LinkedIn, Facebook & Instagram.

Fulfilling websites using systems such as WordPress, Wix, Weebly and Boilerplate HTML systems for a network of clients.

**Website Developer, Elixir Digital** [November 2017 - November 2018] – Working with a team of 4 in Colchester to fulfil websites to a wide network of clients, my duties were; Website Design, Marketing and Sales. This was an adaptive role and often required use of different technologies, and experiences and never any set design processes.
